952 PANTHER XT PLUS

ASSET CATEGORY

R EMOTELY OPERATED VEHICLES

PANTHER XT PLUS ZONE RATED 1000M WCROC

General Description

The Saab Seeye Panther XT Plus is the preferred Light Work Class ROV for the conduct of all of our Inspection Work and general light construction roles. The ROV's ease of mobilization, operation and power to weight ratio makes it the ideal multitask ROV for the offshore and constructions industries.

Fitted with a Tether Management System and Snubber Rotator, the Panthers 10 thrusters make it one of the most powerful ROV's of its type in the world and able to operate in currents up to 3knots.

All details are presented herein in good faith and are believed to be correct at time of publication. System specifications are subject to change without notice.

Applications

The Panther is an excellent all-round performer and is suitable for the following sectors and tasks:

- Inspection, Repair and Maintenance activities – especially inside Jacket Members
- High Resolution Survey Support and Seabed Mapping
- Deep Water Drill support, completion & well intervention
- Dive support
- Pipeline Inspection
